

Metrico

Capitalization table — founder snapshot (pre-Estonian company)

As of: Aug 2026

Currency: n/a (equity %)

Cap table v1

Honesty note. No Estonian OÜ is claimed as registered in this document. No outside investors, convertible notes, SAFEs, or employee option grants have been issued. Percentages below are the *intended founder split* for the forthcoming Estonian company statutes. Confirm with both founders before filing if any number must change.

1. CURRENT STATUS

- Product brand: Metrico (live SaaS / PWA).
- External capital raised: **0**.
- Investor shares outstanding: **0%**.
- ESOP / option pool issued: **none yet** (may be created after company formation).
- IP / product: jointly developed by the founding team (see ownership rows).

2. INTENDED OWNERSHIP (FULLY DILUTED FOUNDERS ONLY)

Shareholder	Role	Ownership	Share class (planned)	Notes
Mehrzad Saeedi	Founder — product, software, GTM	70%	Ordinary (planned OÜ)	Co-founder; primary builder of the live product
Serveh Khoshkalam	Co-founder — finance & accounting consultant/analyst	30%	Ordinary (planned OÜ)	Industrial accounting; Sepehr Construction Group finance lead; remediates Metrico accounting gaps
Outside investors	—	0%	—	None to date
Employee option pool	Reserved (not issued)	0%	To be decided at incorporation	May carve from founders later; not issued today
Total		100%		Founder-owned pre-investment

If the Estonian company later creates an option pool (e.g. 10%), founder percentages would dilute proportionally unless otherwise agreed in writing.

3. CAP TABLE NARRATIVE FOR EVALUATORS

Metrico is founder-owned. The Startup Visa / Committee process is sought to establish an Estonian operating company, not to report a completed fundraising round. Any future

raise would update this table.
