

Metrico

Due diligence summary — founder-prepared data-room brief

Prepared: Aug 2026

Audience: Startup Committee

DD summary v1

Important. This document is an *internal / founder-prepared* due-diligence summary for Startup Estonia evaluators. It is **not** an independent legal, financial, or technical audit and must not be read as a certified due-diligence report from a third party.

1. CORPORATE & LEGAL STATUS

Estonian company	Not registered yet — planned after committee path / e-Residency sequence (see Estonia presence sheet).
Brand / product	Metrico — live SaaS / PWA operated by the founding team.
Founders	Mehrzaad Saeedi; Serveh Khoshkalam (see Cap table snapshot + team brief).
Litigation / IP disputes	None known / none claimed.
Patents	None filed. Potentially patentable product ideas disclosed separately in the application form.

2. PRODUCT & TECHNOLOGY

Stage	Live MVP — production demo and onboarding path available.
Stack (high level)	Web PWA (React in-browser), Supabase backend, GitHub Pages front door.
Core modules	Units/sales, installments, project finance, owner portal, Team plan/RBAC, inventory, progress statements, takeoff, energy, tax workflows, maps & regional analytics, bilingual EN/FA.
Security / access	Auth via Supabase; plan & role gates; activation codes for onboarding. Continuous hardening expected as EU GTM advances.
Known tech debt	Monolith front-end ; Babel runtime; EU card billing under development — disclosed, not hidden.

3. COMMERCIAL & TRACTION

Business model	B2B annual SaaS subscriptions (Starter free → paid tiers including Team).
Pricing (EU list)	€50 / €100 / €150 / €250 (Plus / Pro / Arc / Team) — see Revenue sheet for model assumptions.
Paying traction	Early stage — no invented customer logos or scaled MRR charts. Demo account is labeled demo, not paying traction.

Validation	Founder domain use + small feedback circle + live product (see Market evidence sheet).
Payments	Iran checkout path exists; European payment gateway under development.

4. TEAM & OPERATIONS

Team today	Two founders (product/tech + finance domain). Year-1 plan includes hiring one developer in Estonia after base is set.
Year-1 budget assumption	€40,000 living + GTM planning assumption (not a grant claim / not audited spend).
Relocation sequence	e-Residency / company setup before physical move; relocate after current home-country construction project finishes — no fake calendar dates.

5. COMPLIANCE & PRIVACY

Privacy policy	Published on product/landing pack (EN/FA paths).
GDPR readiness	In progress for EU commercial scale — privacy page exists; fuller EU compliance roadmap continues with company formation.
Data	Customer project data in Supabase; minimize over-claim on residency until EU entity is live.

6. KEY RISKS (DISCLOSED)

- Company not yet Estonian-registered — sequence depends on committee / e-Residency path.
- EU self-serve billing not fully live.
- Early commercial traction — product-first story, not fantasy revenue.
- Cross-border payments / banking friction for founders — mitigated by lean budget and staged move.

7. DATA ROOM — RELATED MATERIALS
