

Metrico

Evidence of a live product — not a slide-only idea

Stage: Live MVP

EN · FA UI

Evidence v1

Bottom line for evaluators. Metrico is a deployed bilingual construction SaaS / PWA you can open in a browser today. This sheet lists public URLs and how to request the labeled demo login. No invented paying-customer charts.

1. PUBLIC PRODUCT SURFACES

Live app (PWA)	https://mehrzad1420.github.io/metrico_by_cursor/index.html
Marketing landing	https://mehrzad1420.github.io/metrico_by_cursor/landing/index.html
Evaluator guide	https://mehrzad1420.github.io/metrico_by_cursor/landing/guide.html
Founding team	https://mehrzad1420.github.io/metrico_by_cursor/landing/team.html
Demo access sheet	https://mehrzad1420.github.io/metrico_by_cursor/landing/demo-access.html — password only via private channel / form field

2. WHAT “LIVE” MEANS HERE

- Hosted web application with authentication and plan/role gates (Supabase-backed).
- Working modules: unit grids, sales/reservations, installments, project finance views, owner portal, inventory, maps, bilingual EN/FA UI.
- Founder runs a live construction project on the product (domain validation).
- Labeled demo account exists for evaluators — sample data, not paying customers.

3. DEMO ACCESS (PRIVATE)

Do not publish the demo password in public PDFs or git. Email for the labeled demo: demo@metrico.app . Password: provide only in a private note field of the application form or a secure message to the programme. See companion PDF *metrico-demo-access-en.pdf* for the print layout used in prior packs.

4. HONEST TRACTION STANCE

Early-stage validation: founder-as-user, small feedback circle, live product. No fake logos, no invented MRR. Commercial scale and EU card billing are on the roadmap after company formation — disclosed in the due-diligence summary.

Metrico live product evidence · English · August 2026 · Open the app before judging “idea only”.
